## Concealed Floor Standing Unit

VRV Indoor unit

The concealed floor units cover a wide range of capacities and can be installed discreetly in order to maintain the fluent lines of the room.

The Daikin VRV indoor unit range is one of the widest on the market, offering no less than 26 stylish and elegant models in 116 different variants - all designed to maximise comfort, minimise operating noise and simplify installation and servicing.

Designed to fit rooms of any size and shape, Daikin indoor units are also user friendly, ultra reliable, easy to control and quiet in operation.

From January 2013, all indoor units will have to comply with the Ecodesign legislation on fans. As a market leader, Daikin has ensured that all indoors units comply with this legislation by adopting DC fans in all indoor units, improving their energy efficiency even further.

### Features and Benefits

- › Its low height means the unit fits perfectly beneath a window
- › Blends unobtrusively with any interior décor: only the suction and discharge grilles are visible
- › Requires very little installation space
- › The connecting port faces downward, eliminating the need to attach auxiliary piping

In all of us,  
a green heart

Daikin's unique position as a manufacturer of air conditioning equipment, compressors and refrigerants has led to its close involvement in environmental issues. For several years Daikin has had the intention to become a leader in the provision of products that have limited impact on the environment. This challenge demands the eco design and development of a wide range of products and an energy management system, resulting in energy conservation and a reduction of waste.
